

DANZIGER “DAN” FLOWER FARM IS PROUD TO PRESENT THE NEW STEP-BY-STEP BROCHURE OF FLOWER DESIGNING WITH XLENCE™

It is with great pleasure that we share with you our ideas and inspiration for using the fabulous XLence™ at special events. The luxurious XLence™ with its extra large-sized, bright white and round-shaped flowers adds elegance to any flower arrangement.

We invite you to get inspired, create and innovate your special moments with XLence™. Let's make the extraordinary an everyday tradition.

The logo for XLence features the word "XLence" in a stylized, elegant serif font. The "X" is particularly large and decorative, with a swirl at its top left. To the right of "XLence" is a small "TM" trademark symbol. Below the main text, the tagline "Extra Large. Extra White. Extraordinary!" is written in a smaller, simpler font.

XLence™
Extra Large. Extra White. Extraordinary!

A ROMANTIC BRIDAL HAND-TIED BOUQUET

THAT WILL MAKE YOUR SPECIAL DAY - A DAY TO REMEMBER

STEP 1 | CLEANING STEMS

First, remove the leaves from stems below the holding point, about two-thirds from the bottom of the stem.

STEP 2 | SPIRAL TWIST FOR UNIFORM SPREADING OF BRANCHES

It is important to weave the gypsophila stems in a clockwise spiral manner so that the XLence™ will be spread out evenly, and the bright and fluffy flowers will wrap the bouquet.

STEP 3 | CUTTING OFF THE STEM EDGES AND TYING THE BOUQUET

When reaching the desired size of the bouquet, cut off the ends- about 6 inches from the holding point.

The next step is to tie the bouquet with anchor tape both at the top and at the bottom of the stems.

STEP 4 | ADDING A DECORATIVE RIBBON

To decorate the bouquet-handle, use a white lace ribbon of about two inches wide and about 6.5 feet long. Place the ribbon near the tying area, stretch the ribbon downwards and twist it around the bouquet in circular-upward motions. Once you have finished wrapping the ribbon around, tie the remaining two ends together. Now form a bow tie-ribbon, fasten it with a wire cord and attach it to the bouquet-handle.

FLOWERS & MATERIALS:

- 6 Stems of XLence™
- 7 Stems of Curcuma
- 10 Stems of Bouvardia
- 7 Stems of Pink Spray Rose
- 10 Stems of Light Purple/Lilac Rose
- 5 Stems of Pink Rose
- 2 Meters of Lace Ribbon
- Anchor Tape

Extra Large. Extra White. Extraordinary!

A COLORFUL BRIDESMAID HAND-TIED BOUQUET

A SUPERB LOOK ON THIS WONDERFUL OCCASION

STEP 1 | CLEANING STEMS & STRAIGHTENING THE GERBERA FLOWERS USING A WIRE

Begin with removing the foliage on the stems below the holding point, about two-thirds from the bottom of the stem. You need to support and straighten the Gerbera stems by winding a 0.03 inch thick wire around the stems. Insert one end of the wire between the flower and stalk and start to coil the wire from this point around the flower stem downwards.

STEP 2 | SPIRAL TWIST FOR UNIFORM SPREADING OF STEMS

It is important to weave in a clockwise spiral manner so that the XLence™ stems are spread out evenly, and the ball-shaped and luxuriant flowers wrap the bouquet.

STEP 3 | CUTTING THE EDGES OF THE STEMS & TYING THE BOUQUET

When reaching the desired size of the bouquet, cut off the ends- about 6 inches from the holding point. The next step is tying the bouquet with anchor tape both at the top and at the bottom of the stems.

STEP 4 | ADDING A DECORATIVE RIBBON

Decorate the handle using a white silk ribbon of about 2 inches wide and 6.5 feet long, place the ribbon near the tying point, and stick a pearl pin to fasten the ribbon. Stretch the ribbon downwards and twist it around the bouquet in circular-upward motions. After wrapping the ribbon around, tie the remaining two ends together. Now form a bow tie ribbon, fasten it with the wire and attach it to the handle with the remaining portion of the wire. Pearl pins along the handle will give that extra touch.

FLOWERS & MATERIALS:

- 10 Stems of XLence™
- 10 Stems of Mini Agapanthus
- 10 Stems of Pink Roses
- 7 Stems of Fuchsia Mini Gerbera
- 7 Stems of Veronica
- 5 Stems of Pink Limonium
- 5 Stems of Pink Alstroemeria
- 6.5 Feet of Silk Ribbon
- 15 Pearl Pins
- 0.03" Thick Wire
- Anchor Tape

A BOUTONNIERE

A TOUCH OF XLENCE™ FOR A MOST ELEGANT LOOK

STEP 1 | PREPARING XLENCE™ BUNCHES

The first step is to make small individual bunches of Xlence™ Gypsophila, about 2 inches long and joining them with a wire of about 0.03 inches thick. The stems are then wrapped with green paper tape.

STEP 2 | PREPARING THE GREEN DRACAENA LEAF

Next, take the Dracaena leaf and cut it in half. Take one half, wire it and put it aside. Take the other half fold it and insert a 0.03 inches wire through the folding line from its side as follows- leaving 1/3 of the wire on one side and the other two thirds on the other side and start coiling the longer wire.

STEP 3 | ASSEMBLING THE BOUTONNIERE

Now we are ready to begin assembling the boutonniere. First, take the Rose and Limonium place them on the remaining half of the green Dracaena leaf, add the Xlence™ bunch and then the other folded half of the Dracaena leaf next to it.

STEP 4 | ASSEMBLING THE BOUTONNIERE

Add the Achillea and Lisianthus, bunching everything together with the green paper tape.

FLOWERS & MATERIALS:

2 Stems of Xlence™

1 Stem of Magenta Limonium

1 Stem of Pink Achillea

1 Stem of Pink Rose

1 Green Dracaena Leaf

1 Stem of Pink Lisianthus

3 Units of 0.03" Thick Wire

Green Paper Tape

A LOVELY CORSAGE

EASILY PREPARED FOR A SPECIAL EVENING

STEP 1 | PREPARING THE CORSAGE BASE WITH CLUSTERS OF XLence™ FLOWERS

The corsage is based on a string of Gypsophila flowers. We begin by forming about 10 small groups of Gypsophila XLence™, each up to 1.2 inches long. Then place the XLence™ bunches one by one while wrapping each one of them to the wire with green paper tape. This process is very similar to that of making a head wreath.

STEP 2 | ATTACHING THE GYPSOPHILA BASE TO THE WRISTLET

Form an "S" shape with the wire. Take the wristlet, and place the strip of Gypsophila in the center and close the clasps.

STEP 3 | ADDING A TOUCH OF COLOR...

Insert 2 Lisianthus flowers one at the top and one on the bottom. Add two Ivy leaves both wired and the 2 Achillea flowers.

STEP 4 | ATTACHING THE HYDRANGEA FLOWERS

Glue about 7 Hydrangea flowers evenly along the Gypsophila XLence™ base, using cold glue.

FLOWERS & MATERIALS:

- 3 Stems of XLence™
- 4 Ivy Leaves
- 1 Stem of Limonium Magenta
- 2 Flowers of Pink Lisianthus
- 2 Stems of Pink Achillea
- 7 Hydrangea Petals
- Green Paper Tape
- 0.03" Thick Wire
- Wrap Wristlets
- Cold Glue

XLence™
Extra Large. Extra White. Extraordinary!

AN EXQUISITE BRIDAL HAND-TIED BOUQUET

FOR THE BEAUTIFUL BRIDE ON THE MOST JOYOUS DAY OF HER LIFE

STEP 1 | SPIRAL TWIST FOR UNIFORM SPREADING OF STEMS

First, remove the leaves from the stems below the holding point, about two-thirds from the bottom of the stem. Group the Roses and Curcuma together in a round coiled bouquet and tie the bouquet.

STEP 2 | ADDING XLENCE™ STEMS ALONG THE BORDERS OF THE BOUQUET

Add the Gypsophila XLence™ stems. It is important to weave in the Gypsophila in a clockwise spiral manner so that the XLence™ stems are spread out evenly, and their bright and luxurious flowers wrap the bouquet. Tie it again.

STEP 3 | ADDING THE LEPIDIUM STEMS

Add the Lepidium stems, double the length of the Gypsophila stems, spiraled around the bouquet's frame.

STEP 4 | TYING THE BOUQUET

Tie the bouquet at the holding point and add a nice lace ribbon.

FLOWERS & MATERIALS:

- 10 Stems of XLence™
- 10 Stems of Purple Roses
- 10 Stems of Pink Roses
- 5 Pink Spray Roses
- 5 Stems of Chocolate Curcuma
- 7 Stems of Lepidium
- 2 Meters of Lace Ribbon
- Anchor Tape

A VALENTINE'S ROMANTIC BOUQUET

AN XLENCE™ WAY TO SAY "I LOVE YOU"

STEP 1 | PREPARING THE STEMS

First, remove the leaves from the stems below the holding point, about two-thirds from the bottom of the stem. Then re-cut the bottom of the stem diagonally to promote the flower's vase-life. Finally, remove the two outer petals of each rose so that the roses open up nicely and evenly.

STEP 2 | SPIRAL TWIST FOR UNIFORM SPREADING OF STEMS

Make sure to weave in the Gypsophila spirally clockwise so that the XLence™ stems and the other flowers spread out evenly. This way the XLence™ fills the bouquet with its rich fluffy and remarkable flowers.

STEP 3 | CUTTING OFF THE STEM EDGES

When reaching the desired size of the bouquet, use shears to cut off the edges to fit into the vase nicely.

FLOWERS & MATERIALS:

- 10 Stems of XLence™
- 12 Stems of Red Roses
- 10 Stems of Liliun longiflorum
- 7 Stems of Safari Sunset

XLence™
Extra Large. Extra White. Extraordinary!

AN ELEGANT & LUXURIOUS TABLE ARRANGEMENT FOR A MEMORABLE EVENT

STEP 1 | SETTING THE LAYOUT FOR THE FLOWER ARRANGEMENT

First, wet the foam according to the manufacturer's instructions. Set the frame for the arrangement, using the dominant green filler, Spider Fern, to determine the length and width of the arrangement, in accordance with the dimensions of the table at the event. Make sure the arrangement is not too tall, so as not to obstruct the view of the guests and thus communication across the table is not disrupted.

STEP 2 | INTERTWINE FLOWERS IN ACCORDANCE WITH THE ARRANGEMENT LAYOUT

The next step is to combine the Asclepias Moby Dick, Bouvardia and Lisianthus flowers into the arrangement frame, after adjusting the length of the stems to the desired size. It is important not to exceed the size of the frame determined by the dominant green filler in the first step.

STEP 3 | ADDING XLENCE™ TO THE ARRANGEMENT

XLence™ is interlaced between the flowers to enrich the arrangement creating a feeling of elegance.

STEP 4 | FINAL TOUCH

For the final touch add Tillandsia evenly across the layout.

FLOWERS & MATERIALS:

- 20 Stems of XLence™
- 10 Stems of Spider Fern
- 10 Stems of Pittosporum
- 10 Stems of Gray Leatherleaf Fern
- 15 Stems of Asclepias Moby Dick
- 10 Stems of Lisianthus
- 10 Stems of Bouvardia
- 2 Stems of Tillandsia
- 2 Blocks of Foam

XLence™
Extra Large. Extra White. Extraordinary!
